Among the Farmers

Oh, substance circling earth's eternal rock
You've given little unto me and mine,
In your soft hands I've trusted plant and vine
And your response has been an awful shock;
Corn, beans and spuds have I consigned
To you, to work your great fruition,
But you with some queer vagary of mind,
Have put me in a mighty mean position.

The farmer is the nation's vertebrae.

And likewise corner-stone and deepest stratum,
So they say; unless he sows and tills and prunes
We'd soon be economically at sea, or else marconed,
You, wondrous dust that keeps the world agog,
Should recompense me fairly, all agree,
But, somehow, scratching you's a thankless job;
I'm ready now to shut up shop and fiee.
—Byron Akers. Red Clover Failure.

Clover failure is one of the most serious problems at present confronting the farmer in many of the clover sec-tions. With continuous cropping and the consequent reduction of the humus and plant food in the soil the difficulty of growing red clover is greatly ineased. This condition must be met nd solved, since the loss of red clover or its equivalent from the rotation leads rapidly to a run-down farm and unprofitble crop yields. The farmer who is contemplating seeding a field to clover in the spring may well look to the suitability of that par-

factors, say the clover men of the United States Department of Agriculture, which are responsible for the failure of securing or maintaining a stand of clover, but these factors may be placed in five groups: Soll exhaustion; improper seeding methods, nurse crops, etc.; unfit seed; diseases; and improper treatment Clover fails more often, according to have become poor in lime, phosphorus, potash, or organic matter than for all other reasons. If lime is badly needed, there is no use wasting clover seed. If phosphorus is the limiting factor, the addition of lime alone, even if the land is "sour," will have slight effect. Manure will do good more often than anything else, but when lime is needed the land the standard of the land and limerick academies for a year or so after graduating, then entered Bangor Theological er after this need has been supplied than before. By making the soil conditions

Where red clover can not be grown without the addition of lime or other soil amendments and where the application of these is for any reason impracticable alsike clover should first be substituted for red clover, or it may be pos-sible to grow mammoth clover for soil improvement after common red clover will no longer thrive, and by turning under the mammoth clover the soil may be restored to a condition in . which it will

produce a stand of red clover. dairy section recently said: "Farmers who buy oleo ask me to wrap it secretly. They seem to be ashamed to have any railroad station on the arrival of express one know that they purchase it." When a man still has pride there is hope that piles of express on the platform to be ome day he will reform.

Oxford County Notes.

cisco, Calif., which is of more than pass-ing interest to people of Oxford County, It was that of Miss Sarah Dix Hamlin. he was a great-granddaughter of Eleazer Hamlin, who was also the grandfather of Hannibal Hamlin, Paris', most noted son, and the father of Africa, America Eleazer and Hannibal Hamlin, who set tled in Waterford; and the grandfather of Rev. Cyrus Hamlin, D. D., missionary to Turkey. Miss Hamlin was born in Harvard, Mass., in which town Eleazer lived during a part of his life. She was not dependent upon her rela ives, however, for a reputation. She had a distinguished career of her own. In her early life she went to India, where she established schools. Later she returned to this country and settled in San Francisco, where she was for many years principal of the Hamlin School. She was 83 years old at the time of her death. She leaves one sister, Miss Kath erine Hamlin, who is the last representa

There was a gathering in Portland few days ago, which must be of considerable interest to people residing in the southern part of Oxford County. It was a dinner tendered by the medical pro-fession of Cumberland County to the six doctors in the association who had prac- fursa ticed in the county for fifty years or more. The eldest of these physicians was Dr. Augustus S. Thayer of Port-land. The others were Dr. Abner O. ticular field for the growing of clover before sowing the seed. There are many Shaw, Dr. B. F. Dunn and Dr. James A Spalding of Portland, and Dr. Joseph L Bennett of Bridgton. Dr. John I. Sturgis of New Gloucester was unable to attend. Dr. Thayer was born in Paris 88 years ago, the son of America and Caroline (Prentiss) Thayer. Dr. Thayer has worn a pink in his button hole every day for fifty-five years in honor of his moth er. More than one hundred physicians

tive of the Hamlins in Harvard.

attended the banquet. Another interesting event to Oxford County people, especially those residing in Paris, was the birthday of Rev. Henry results from manure will be much greater after this need has been supplied than before. By making the soil conditions was ordained in 1866 and has had three such as favor the growth of clover settlements, Solon, Bingham and Woolfailure can nearly always be turned to wich. In the latter place he remained many years. While in this charge he became interested in the early settle ments of the lower Kennebec valley. He spent much time in investigation and has written many valuable articles as a result. He is a member of the Maine Historical-Society. He married Miss Sarah E. Hewett of South Paris. This

birthday was celebrated at the home of his daughter in New York City. Freeland O. Stanley of Newton, Mass. president of the board of trustees at Hebron Academy, has been much intercatnip lure developed by the for their manufacture. He is an inventor The Biological Survey of the depart- tion, that of making violins. He made ment developed this lure a number of some inquiries about timber while on a months ago and is now using it exten recent visit to Kingfield this state, and sively in the western states in trapping is likely to visit this section again for

New Trial Denied: One of the most sensational trials

recent years in Oxford County courts was that of Romauld Paradis vs. Cedric Judkins. the lions seemed to take a great interest | It will be remembered that the defend in him. He threw the catnip into the cage to the great delight of the big cat, which acted much as domestic cats do over a similar gift. He says the lion fell on the small sprig and gave evidence of to catch the "runners." Among the A number of years later catnip was methods he took to accomplish this end bound to the ton of the green plants. motion was entered by the plaintiff for a new trial. This motion has been denied in a rescript just handed down by Associate Justice George M. Hanson f Calais, a part of which follows: "We are persuaded that the finding

the jury is fortified by the evidence. "The questions were submitted to the The way to find out what a cow is not say from the whole record, as matter

and during the first year he was able to pressed the jury, and that is the alleged cull out a number of his low producers due care and lawful use of the highway pressed the jury, and that is the alleged and get a running idea of what his herd was in general. He concluded from the first year's testing that feeding was a very important problem and also that the feeding of the individual cow was a great deal more important than it had generally been supposed. This year he spent considerable time on the feeding of his herd, and he discovered a cow which had a wonderful ability to utilize the feed given and to return a profit on the feed consumed. At the present time on the feed consequences. To the resulting damage the feed consumed. At the present time consequences. To the resulting damage this cow has been fresh about four his own want of due care contributed in

POISONING FROM DYED FURS PARAGRAPHS FOR A death occurred recently in San Fran-

Chemical With Formidable Name I Blamed in England for Serious Skin Affections. Last winter and the winter before nany cases of a peculiar skin poisonng of women were reported in Eng-

and. The principal symptoms were

lotches and swelling with itching and burning, so severe in some cases as o prevent sleep for several nights. Investigation has shown that the rouble came from wearing furs, chiefy rabbit dyed to imitate beaver, says Tygela. On analysis the dye was found to be metaphenylenediamine The dye apparently had not been fixed properly, so that a part was removed when it came in contact with moist Metaphenylenediamine is closely related chemically to paraphenylenedia-

this country as a constituent of hair cases of severe poisoning have resulted in past years in this country from There appears to be great variabil-

mine, which has been much used in

ity in sensitivity among different persons. Most persons who use the hair dyes or who wear dyed furs suffer no inconvenience, but occasionally one at their home in St. Johnsbury, Vt. develops alarming symptoms. It would be well for persons who wear dyed furs to remember that irritation of the skin may be due to their furs. Furs that have caused poisoning may be recolored with some dye that is propery set and will not rub off.

HATTONCHATEL IS RESTORED illage Familiar to Yanks in War Re built Through Efforts of American Woman.

Frenchmen- and Americans met a few days ago at Hattonchatel, just salient in September, 1918.

Hattonchatel is directly on the line n the Toul sector which American roops occupied until the end of the war after the salient had been taken. The village was under constant shellcontemplates the building of a factory had spent her summers in Hattonchatel for some years before the war began. The village was endeared to her, and she gave a large sum of money to help in its restoration. It is a place endeared to American soldiers because of its associations. It stands today as it stood before the vandal cannon had leveled it with the earth. Its restoration was worth celebrating.-Rocky Mountain News.

Prepared by the Boston Office of the Bureau of Agricultural Economics.

U. S. Dept. of Agriculture For week ending Dec. 1, 1923

FRUITS AND VEGETABLES The Boston wholesale market for fruits and vegetables was stimulated to some extent by the holiday demand but the market today has assumed its usual dull aspect of the past two weeks. Celery was in good demand at \$3.50-3.75 for New York 2/3 cases in the rough. Cranberries sold out well but at weak prices. Howe in barrels brought \$7.00-7.50; Early Blacks tatoes because of light supply and good demand sold at a premium just before Thanksgiving. The original receivers tee to secure the necessary funds to finance its building and to superintend the job.

The Liggett Drug Company, a sub

Here and There.

Arthur Weigall, the newspaper write and Egyptologist, is going to lecture in Portland this week on the Land of th Pharaobs. It is admitted he should know something about this land as he was a newspaper representative there in the digging out and opening of the tomb of old King Tut. He is going to lec ture, however, on Cleopatra, and he thinks he knows a lot more about he than the rest of us; but it is a foregone conclusion that if he tells what he says he is going to, the reputation of that oldtime queen is going to be ruined. Her renown rests chiefly on her love passage with Mark Anthony, and Mr. Weigal save she did not have one. He says she wasn't a vamp but one of the marrying kind; but it did not matter much to he thether she had her husbands abreas or tandem. She thought she was mar ried to Julius Casar, but when he left there was Mark Anthony handy so she took him. Weigall has robbed her of the traditional glory of her mahogany locks. He says they were faded out sand color. Worse than all else, he says sha had a hook-nose. One has alway been led to suppose she was a lotus flow er from the Nile but Weigall says she was Greek, and wore flowing Greek robes, instead of snappy, Egyptian, one

Real Valuation

"What did it cost?" is quite different from "How much is it worth?" The answer depends on where you buy. Quality is not an elusive element with this store. It is warp and woof of all our merchandise. When one makes a purchase here the quality is assured, no matter how low the price.

The assurance given that the merchandise of this store may in every instance be relied upon as being of good quality, is one of the strong factors entering into the success of our holiday sales. The gift chosen here carries with it a certain element of worth that at once enhances the value to the

Our store is now taking on its holiday dress and each day will present new displays of special attractiveness.

Just how long cranberries have been known and used it is difficult to say, but certain it is that they now hold a secure position and are always warmly wel-comed. The cranberry has a double virtue, in that it has a stimulating deiciousness and a bright attractiveness which add at the same time zest and Boys', " beauty to any meal at which they ar

Cranberries Daintily Cooked.

possible to walk along in early summer and see stretching out on either hand acres of apparently useless bog covered

with short green vines. If you are

stranger in such 'parts, the vast areas

may mean nothing to you but a most uninteresting bit of nature, and you may

waste places. To those people, how ever, the picture is very different, to

they know that with the coming of fall

hese same vines will be laden with

colored cranberries, for which no doubt

bushels—yes, barrels—of large, ruby

you will be eagerly searching your local

Cranberry sauce is made in a variety if ways. In this article we shall treat of a sauce which we have found particu Pick over the berries carefully, discard ing any which are soft or imperfect.
Then place them in a strainer or colan-Boudoir Lamps with parchment shades. An attractive der, wash them with cold water, drain, and measure out four cupfuls of the berries. Meanwhile place in a saucepan two cupfuls of sugar and two cupfuls of solved; then boil from five to ten minntes until a thin sirup is formed. Now cover, and cook them until tender and transparent. Care should be taken to

keep them simmering gently to prevent their bursting open, for part of the appeal of this dish lies in the firm, whole berries in the clear, red sirup. If any soum forms during the cooking, remove it, and do not cook after the ber ries are tender, for long cooking renders them bitter and unpalatable. If it is Children's, ossible, it is better to make this sauce t least a day before it is used, in order develop its flavor.

Perhaps you may prefer to serve cran-berry jelly. For this, pick over and wash thoroughly one quart of good firm berries. Place them in a stewpan with one cupful of boiling water. Allow them to boil about ten minutes, or until they are soft. Remove from fire and pour in to a sieve. Then with the back of a wooden spoon mash through the sieve as much of the pulp as possible. Place the strained pulp and juice again in the stewpan, add two cupfuls of sugar, and return to the fire. Allow them to come to a boil, stirring so that the sugar is thoroughly dissolved. Turn immediately into a wet mold or sterilized glasses for longer cooking may cause it to go beyond the jellying stage, and it will ot stiffen or "set."

Owing to the high acid content, cranberry jally has a tendency to liquefy if kept a long period of time. For this reason, it is better to plan to use it soon after making. Either of the above dishes is excellent served with turkey or with any kind of meat, and is particular ly adaptable for the carrying out of Christmas color scheme.

article having a point, must give in reto avert bad luck. The Christmas gift ish the old set or begin the new would be well worth this necessary remuners tion in keeping the adage.

The newest note in kitchen cutlery is
the introduction of stainless steel blades. \$618,108.84 Such knives are praiseworthy not only

226,856.15 because of the ease with which they are kept shining, but because with their use 6,483.62 in paring fruit or vegetables there is less tendency of staining the hands and, of course, for this reason less staining of the food being pared. We have found this to be quite noticeable at the canning 19,086.63 season when large quantities of fruit must be prepared. A paring knife with guard adds to the comfort of using the \$906,639.67 knife in protecting the finger from the back of the knife blade. The ordinary sized family can well afford to boast of two or three paring knives, one of which \$ 50,000.00 cause of its adaptability to digging out small defects or potato eyes. 25,000.00 Grapefruit is such a popular fruit for the winter breakfast that we have placed 25,884.70 the grapefruit knife in the class of neces sities for the kitchen knife drawer 791,751.97 These knives can be purchased with a cutting edge at one or both sides as preferred.

Just a word about the use of the ser-rated bread knife. A sawing stroke will cut bread or cake evenly and quickly: It is this trick which many possessors knives of this type do not know. The spatula has many uses. Being flexible, the broad spatula lends itsel removing cookies from the pan, for turn ing meat balls, potato cakes, etc. Us the long, narrow spatula for spreading frostings, loosening cakes from baking pans, working fondant, or scraping the

to the dishwasher. Since too many knives and forks be as troublesome as too few, we have chosen as an adequate set the following pieces: One meat elicing knife, on Horace Holman late of Dixfield, deceased; bread knife, one large fork, one small will and petition for probate thereof and the appointment of Peter G. Barrett as executor of the same to act without bond as expressed in said will presented by said Peter G. Barrett, the executor therein named.

with blotting paper safeguards th Mary H. Andrews late of Fryeburg, deceased; will and petition for probate thereof and the appointment of Cyrus K. Chapman as executor of the same to act without bond presented by said Cyrus K. Chapman, the executor therein will surely back us up in saying that eceased; dull knife is almost a menace in the the user's disposition.
